

## Kako naljepiti foliju?

How to apply the sticker ?

### 1.

Površinu na koju lijepite naljepnicu dobro operite, odmastite i osušite.

*Thoroughly wash, degrease, and dry the surface where you will apply the sticker.*

### 2.

Naljepnica koju ste dobili ima papirnatu pozadinu, znamenke u boji i prozirnu transfer foliju

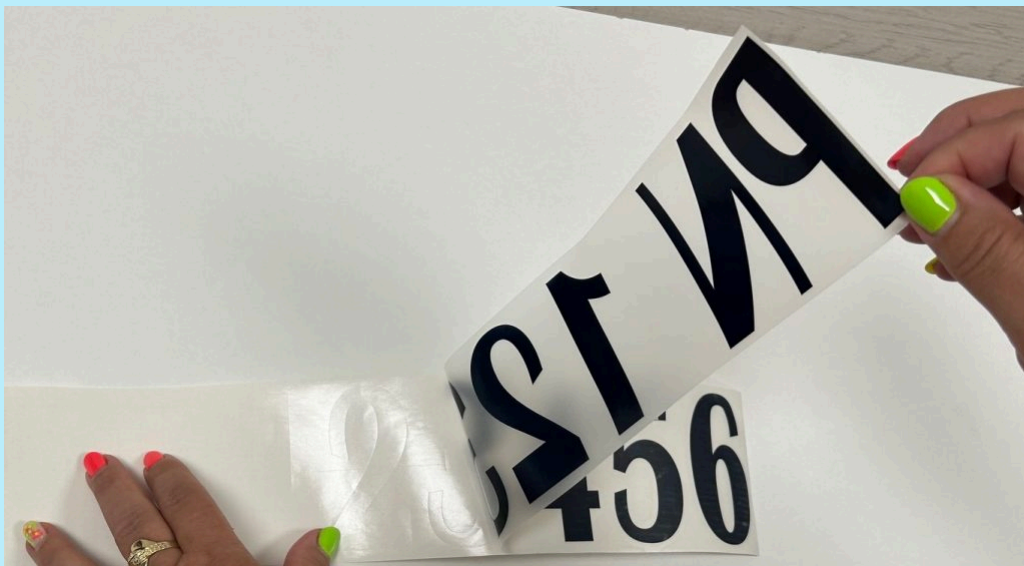

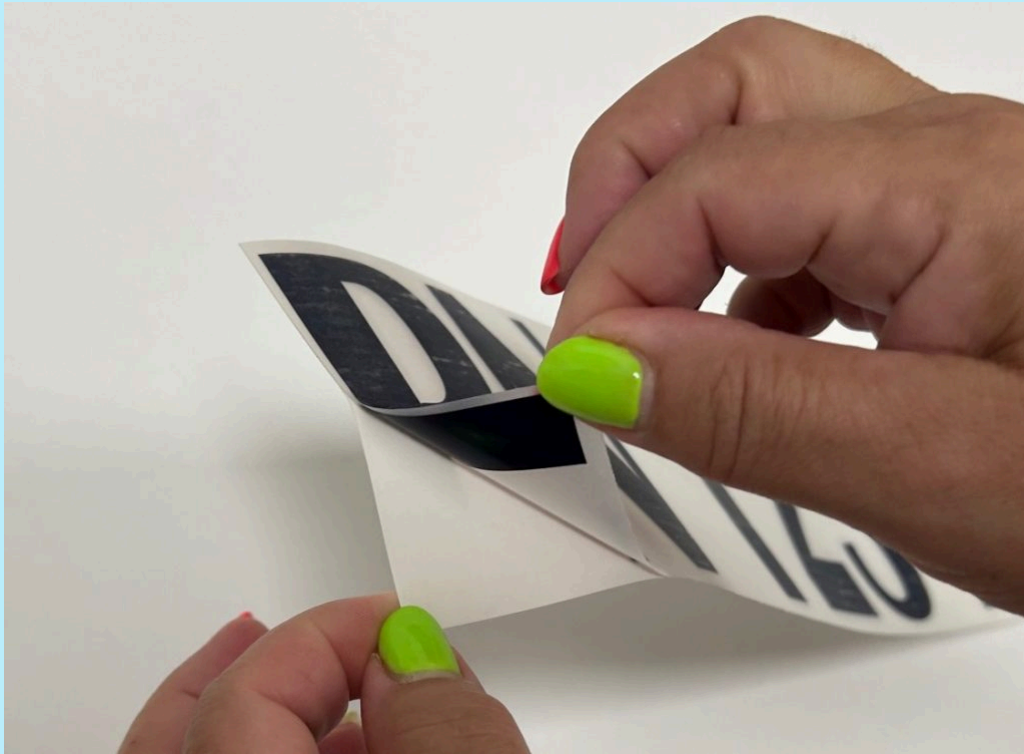

*The sticker you received has a paper backing, colored text, and a transparent transfer film.*

### 3.

Odljepite prozirnu transfer foliju na kojoj će ostati slova i brojke

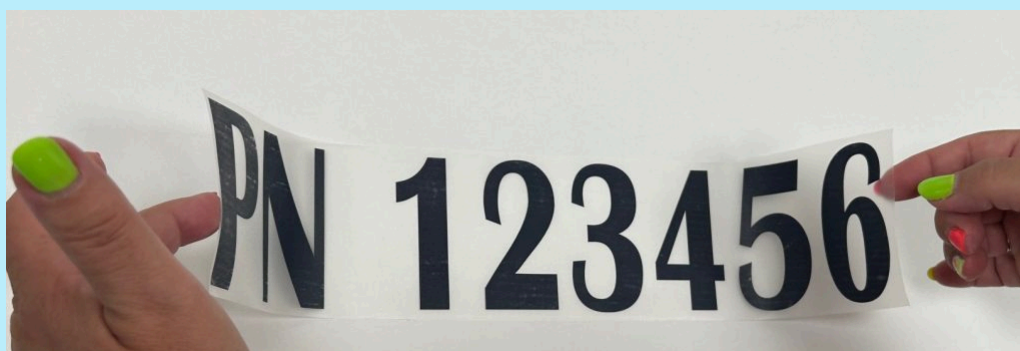

*Peel off the transparent transfer film, on which the letters and numbers will remain.*

#### 4.

Položite transfernu foliju sa slovima na podlogu. Naljepnicu ljepite od sredine prema krajevima kako se ne bi stvarali zračni jastuci ispod folije.

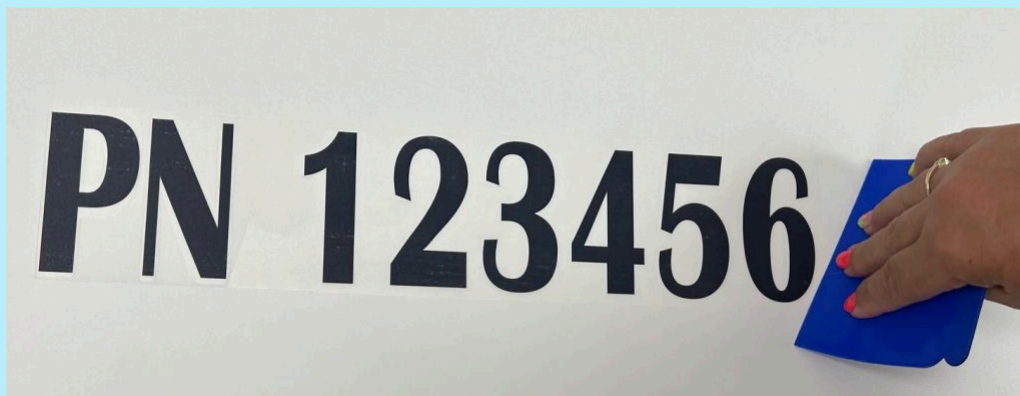

*Place the transfer film with the letters onto the surface. Apply the sticker from the center towards the edges to avoid creating air bubbles under the film.*

#### 5.

Plastičnom lopaticom ili nekim drugim sličnim predmetom istisnite zrak prema krajevima naljepnice.

*Use a plastic spatula or a similar object to push the air out towards the edges of the sticker.*

## 6.

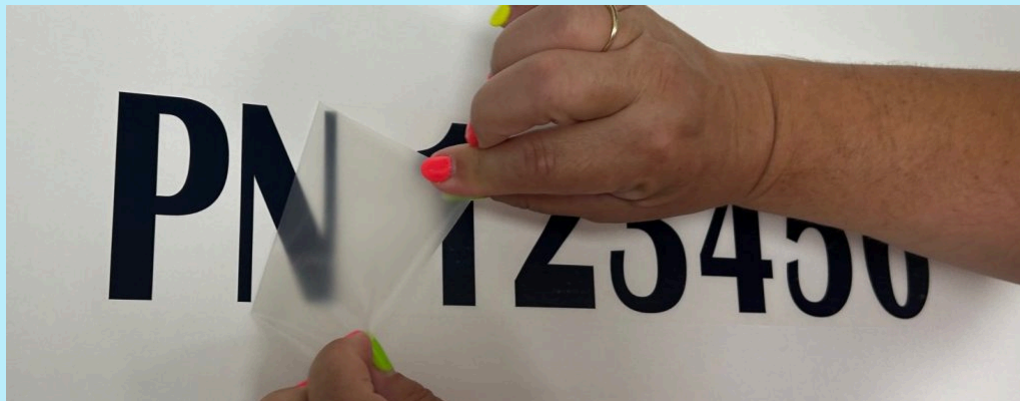

Ostavite natpis sa transfernom folijom nekoliko sati ( po mogućnosti na suncu )kako bi se slova i brojke dobro zalijepile.

*Leave the label with the transfer film for a few hours (preferably in the sun) to ensure the letters and numbers adhere well.*

## 7.

Odljepite transfernu foliju.

Peel off the transfer film.

**Vaš natpis je gotov !**

***Your stricker is finished!***
